Target version:	3.20.0		

Description

As noticed by Victoria some ancient places like ruins can't be found in the GeoNames search e.g.
<https://www.geonames.org/2468221/henchir-el-kasba.html>

Since this will be quite useful for historical and archaeological projects we will add this class ("S spot, building, farm" see <http://www.geonames.org/export/codes.html>) to the OpenAtlas GeoNames search.

In case the results will get to confusing we will think about an advanced GeoNames search that the users can decide in which classes to search.

History

#1 - 2019-09-01 15:29 - Alexander Watzinger

- Status changed from Assigned to Closed

#2 - 2019-09-18 16:25 - Alexander Watzinger

- Estimated time set to 4.00 h

#3 - 2019-09-30 19:24 - Alexander Watzinger

- Subject changed from Add more codes to GeoNames search to Additional codes for GeoNames search
