

OpenAtlas - Bug #1306

Search results: small table, missing mouse over description

Description

Like Berni already noted our search seems to have some issues:

- Table is very narrow
- Mouse over abbreviated name or description isn't working, should be showing full text
- Also we may should activate all classes by default. It would than be the same behavior like coming from global search and otherwise people may wonder why there are no search results (if the didn't actively selected classes)

See at demo: <https://demo.openatlas.eu/overview/search>, select all classes and search for e.g. **a**
