Description

With growing software and user base additional manual content would be nice. I made a list of topics I think important. Of course the whole team is invited to join the effort but please keep in mind to only make changes in the **develop** branch to avoid merge conflicts.

- Add model to tools
- Add more images, e.g. network visualization examples
- Troubleshooting: login errors
- Troubleshooting: display errors
- Troubleshooting: error code pages (403, 404, 418)
