Target version:	5.8.0		
Description			
Making some features optional in the profile to not clutter the user interface. Some ideas:			
<ul style="list-style-type: none">• API (for showing links at entity)• File upload• Administrative units• Historical places			

History

I agree with you, except with sub events. It is a core feature and it is possible, that the PI doesn't know that user need it, and user maybe doesn't know that this feature exist.

Removing some ideas:

- **Sub events:** @ Berni, good point, I removed this option
- **specified type hierarchies:** @ Stefan, like already discussed in [#929](#) (Module Options): configurable type display sounds like a very useful feature. It would be great if you add a new issue for this because it isn't quite in the scope of modules.
- **Export:** is only available for admin/manger anyway
