

OpenAtlas - Feature #1513

Add reference page for multiple files

2021-05-10 07:58 - Bernhard Koschiček-Krombholz

Status:	Closed	Start date:	2021-05-10
Priority:	Normal	Estimated time:	0.00 hour
Assignee:	Bernhard Koschiček-Krombholz		
Category:	Backend		
Target version:	6.3.0		

Description

When uploading and linking multiple files to a reference, it is not possible to add a page number directly, so it has to be done individually afterwards. This could be quite cumbersome e.g. when entering multiple images from a catalogue where there can be many images on one page.

To make it more efficient, we could add the page number field directly when adding and linking a reference. We can implement this also for adding references from other entities like e.g. actor which will save a few clicks when entering data.

Update

If *files* are added through a *reference*, the page input field is visible in the file upload form and the between page is not needed any more. The entered page will be added to all uploaded files.

- *Description updated*

Thank you very much for adding this issue. I took the liberty to adapt the description a little and adding implementing the page field also when adding references from other entities.

I suggest we took a look at it together in the next develop session.

- *Description updated*

Fixed in develop version 6.3.0 and already online at Thanados.

Thank you, Nina, for reporting.
