

OpenAtlas - Feature #1541

Linking references to multiple subunits

2021-06-28 15:54 - Nina Richards

Status: Closed	Start date: 2022-06-22
Priority: Normal	Estimated time: 0.00 hour
Assignee: Alexander Watzinger	
Category: UI	
Target version: 7.7.0	
Description Linking multiple subunits to one reference at a time would be highly desirable. it would save a lot of time during data entry. As already discussed with Alex, the following steps would be necessary: To do <ul style="list-style-type: none">• activate multiple linking from reference (the user has to decide if or what to write into the page field) Done (#1637) <ul style="list-style-type: none">• make subunits link able from "reference" (at the moment only places can be linked from references) Has its own issue (#1752) <ul style="list-style-type: none">• to be able to differentiate between names like grave 001, show the root of the sub unit as well

- Target version changed from Wishlist to 7.5.0

With the new functionality in [#1637](#) this should be possible now too.

- *Status changed from Acknowledged to Closed*
- *Assignee set to Alexander Watzinger*
- *Target version changed from 7.8.0 to 7.7.0*

It is now possible to link multiple places and/or sub units in one go to a reference. Implemented in the **develop** branch.
Thank you for reporting this suggestion for improvement.
