

OpenAtlas - Bug #1779

View jumps to top if map search is used

2022-08-09 16:07 - Alexander Watzinger

Description

If you click on the search field in the map, the page jumps to the top of the page.
This is especially awkward if the map is below a table or form when e.g. using a small window.
This was originally reported by Nina but I postponed it because it was at a time when the map was rebuild completely, nevertheless this seems to be still an issue.

History

#1 - 2022-08-10 14:08 - Andreas Olschnögger

- Status changed from Assigned to Resolved

Now when clicking on the geonames search the view won't jump to the top of the page anymore.
Changes are in develop.

#2 - 2022-08-10 16:40 - Alexander Watzinger

- Status changed from Resolved to Closed

It now works as expected. Thanks a lot, Andi.
