

OpenAtlas - Bug #941

Text in brackets of subtypes disappears when edited

2018-09-28 12:53 - Bernhard Koschiček-Krombholz

Status:	Closed	Start date:	2018-09-28
Priority:	Low	Estimated time:	0.00 hour
Assignee:	Alexander Watzinger		
Category:	UI		
Target version:	3.9.0		
Found in version:	3.8.0		

Description

When I edit a custom sub type with a brackets in the name, the brackets with content doesn't appear at the Name field. Confer screenshot for clarity.

Are brackets forbidden in types?

History

#1 - 2018-09-28 12:54 - Bernhard Koschiček-Krombholz

- Subject changed from *Text in Brackets disappears when edited* to *Text in brackets of subtypes disappears when edited*

#2 - 2018-09-28 16:28 - Alexander Watzinger

- Category set to *UI*

- Status changed from *New* to *Closed*

- Assignee set to *Alexander Watzinger*

- Target version set to *3.9.0*

It's not a bug it's a feature ;)

No, seriously, type names can't include round brackets because they are already used for labels in directed types e.g. "parent of (child of)".

The two alternatives I could think of:

- use some special character string e.g. "parent of ### child of"
- save the opposite label information somewhere else

But both alternatives would be problematic when loosing the context e.g. the data is imported/used in other systems.

However, since this is not obvious I documented it in the manual and added a link to the type overview.

As always, thanks for reporting!
